Creating Audio Mods

Updated Information

Legacy - FFmpeg (SFX & VO) - Eternal Mod Injector

You need the FFmpeg extension for Audacity to import/export OPUS audio files - **Download**

1. Install **ffmpeg-win-#.#.#.exe** -> Follow the installation instructions
2. Open Audacity -> Edit -> Preferences -> Libraries
3. FFmpeg Library: Locate... -> Browse... -> Find **avformat-55.dll** -> OK
4. **SFX & VO:** Convert all of the audio you want to export to OPUS.
   (Export Audio -> OggOpus - 64 kbps for high quality)

Be sure to export the OPUS file in either mono or stereo depending on the format of the original file.

Sometimes, Audacity will automatically find avformat-55.dll

If the **exe** version does not work, download the **zip option** and extract it into a new folder called **ffmpeg-win-#.#.#** (depending on the version number) and extract all its contents in there. Then attempt to locate FFmpeg.
